**Integrated Classrooms:** There are currently three integrated preschool classrooms which adhere to the mandated student ratios of 7 special education students, 7 peer model students, and one at risk student per classroom per session. The integrated classrooms offer special education services for the eligible students based upon individualized needs identified through the IEP process. The students have a full-range access to services as determined through the IEP Team Process. The peer model students pay for the sessions as parent's deemed appropriate. **Transition Classroom:** The district has developed a Transitional Pre-school classroom to meet the educational needs expressed by the parents of Stoughton.

This classroom is targeting the students who miss the birthday cut-off to attend the district Kindergarten program. This is designed to allow student to prepare their minds and bodies for the rigor of a full day academic classroom. This classroom will adhere to the class size ratios of 1 teacher: up to 20 students: 1 paraprofessional as mandated by the ECC. This classroom is self-funded based upon tuition revenue. If the enrollment drops the classroom will be eliminated due to lack of funding.
